

Trade Report Summary	
Name:	CHANDRAKANT
PAN:	ARQPG9033N
Period:	01-Apr-2025 - 31-Mar-2026
Financial Year:	2025-2026
Summary SPOT	Amount (INR)
Total Portfolio Value:	15,274.77
Realized Profit - Net Profit INR *	32.30
Realized Profit - Schedule VDA **	750.05
Summary Contracts - Future	
Total Value Traded:	0.00
Profit from Trade:	0.00
Summary Contracts - Options	
Total Value Traded:	0.00
Profit from Trade:	0.00
Other Income	
Staking Rewards	0.00
Others	0.00
Total Deposit/Withdrawal	
Deposit Made	15,530.00
Withdrawal Made	1,635.00

Refer Notes Sheet before using the report for disclaimer and each statement/report interpretation

* Please refer, column 19 of Detailed OB

** Please refer, column 8 of Schedule VDA sheet

#	IMPORTANT DISCLAIMER — PLEASE READ CAREFULLY
1	NOT A TAX ADVICE DOCUMENT: This statement is generated for informational purposes only and is not intended to be legal advice, or financial advice. Users are strongly advised to consult a tax professional before filing any Income Tax Return (ITR) or making any financial decisions.
2	NO LIABILITY FOR TAX CALCULATIONS: The PLATFORM is not responsible for any tax calculations or computations appearing in this statement. The user acknowledges the consequences arising from the use of, or reliance on, the PLATFORM.
3	STATEMENT MAY HAVE DEFICIENCIES: This statement may contain system-related inaccuracies. The user acknowledges that any discrepancy should be verified against actual transactions.
4	CANNOT BE USED AGAINST THE PLATFORM: This statement is for informational purposes only and cannot be used as evidence in any legal proceedings against the PLATFORM or its affiliates.
5	DYNAMIC LEGAL LANDSCAPE: Virtual Digital Asset (VDA) regulations are subject to change, including the Finance Act of 2025, and notifications/circulars issued by the Central Board of Direct Taxes (CBDT). Users should refer to applicable law as on the date of their ITR filing.
6	FIFO METHODOLOGY: The statement uses the First In, First Out (FIFO) method for VDA accounting in India. The cost allocation remains subject to the user's professional judgment.
7	DATA SOURCE LIMITATION: This statement is generated based on blockchain data, or user-provided information. The PLATFORM does not verify the accuracy of transactions, wallet transfers, or external data sources.
8	NOT AN OFFICIAL TAX DOCUMENT: This statement is not a conclusive evidence of tax computation or liability. It is for informational purposes only.
9	VALUATION DISCLAIMER: Asset values, fair market value, and timestamps may vary across sources. The PLATFORM does not guarantee the accuracy of valuations.
10	NO AUDIT OR ASSURANCE: This statement has not been audited or assured by any third party.

CUM ACCOUNT STATEMENT — EXPLANATORY NOTES

PLEASE READ CAREFULLY BEFORE USING THIS STATEMENT

generated solely for informational and record-keeping purposes. It does NOT constitute tax advice, and you are advised to consult a qualified Chartered Accountant (CA) or Tax Consultant, or legal professional for any tax-related decision.

PLATFORM does not warrant the accuracy, completeness, or fitness for any particular purpose of the tax statement. The PLATFORM shall not be liable for any tax demand, penalty, interest, or legal action arising from, or in connection with, this statement.

The statement is system-generated and may contain typographical errors, data gaps, rounding differences, or other discrepancies. It is possible that this statement may not capture all transactions in all circumstances, and any apparent discrepancies may arise from the transaction records and invoices available on the platform.

This statement shall not be construed as an admission of liability by the PLATFORM for any tax obligation arising from, or in connection with, any legal, regulatory, arbitral, or judicial proceeding against the PLATFORM or its officers, employees, or agents.

VDA) taxation in India is evolving. The Income Tax Act, 1961 (as amended), the Income Tax Act, 1922, and the Central Board of Direct Taxes (CBDT) are subject to change. Users must independently verify the tax treatment of their transactions.

The PLATFORM uses the First-In-First-Out (FIFO) methodology for cost allocation on a symbol-wise basis, as is the generally accepted practice. However, the Income Tax Department has not mandated a specific methodology; thus, the tax treatment of any transaction may vary based on a professional tax adviser's guidance.

The statement is generated based on data available within the PLATFORM and may rely on third-party integrations. While the PLATFORM does not guarantee the completeness or accuracy of such data, particularly for off-platform transactions, it strives for accuracy.

This statement is not a government-issued or certified tax document and may not be accepted by tax authorities as such.

The prices, and conversion rates used in this statement are based on available market data at specific points in time. The PLATFORM does not guarantee uniformity with values adopted by tax authorities.

This statement has not been audited, reviewed, or certified by any chartered accountant or professional authority.

This statement covers all transactions executed on the platform during the Date Range Selected or Financial Year in case any specific FY selected. It consolidates SPOT trades, Futures (INR & USDT), Options (INR & USDT), Boost trades, Staking/Rewards/Airdrops, Deposits/Withdrawals, into separate sheets for ease of reference.

Under Section 2(47A) of the Income Tax Act, 1961 (inserted by Finance Act, 2022) and retained under Income Tax Act, 2025, a Virtual Digital Asset (VDA) includes any information, code, number, or token (not being Indian currency or foreign currency) generated through cryptographic means or otherwise, providing a digital representation of value exchanged with or without consideration, and includes cryptocurrency, non-fungible tokens (NFTs), and any other digital asset as notified by the Central Government. All crypto assets traded on this platform are classified as VDAs.

Profits arising from the transfer of VDAs are taxed at a flat rate of 30% (plus applicable surcharge and 4% Health & Education Cess) under Section 115BBH of the Income Tax Act, 1961, and the equivalent provision in the Income Tax Act, 2025. This rate is uniform and does not vary with the holding period, there is NO distinction between short-term and long-term capital gains for VDAs.

Losses incurred from the transfer of any VDA cannot be set off against income from any other head (including salary, house property, business income, or other capital gains), nor can they be carried forward to subsequent financial years. This is mandated by the proviso to Section 115BBH(2) of the Income Tax Act, 1961. Users should consult their tax adviser.

Pursuant to Section 194S of the Income Tax Act, 1961, a TDS of 1% is deducted on every transfer of a VDA if the aggregate consideration. TDS appears in the statement as a deduction from sale consideration. TDS is NOT an additional tax, it is an advance payment of tax credited to the user's PAN and is claimable as credit while filing ITR. Users must verify TDS amounts against their Form 26AS / AIS on the Income Tax Portal (www.incometax.gov.in).

All INR amounts shown in this statement are derived from the order-execution price at the time of each transaction on the platform. For USDT-denominated contracts, the INR equivalent is calculated using the USDT/INR reference SPOT rate prevailing at the time of trade execution. These rates are provided as a reference for fair market valuation. As per CBDT guidelines, for ITR purposes, FMV of VDAs traded on a recognised exchange is the price at which they are traded on that exchange at the relevant time. Users and their advisers may use these reference rates for ITR computations but should independently verify them. We are not liable for any error reported.

This statement applies the First-In-First-Out (FIFO) method on a symbol-wise basis for matching buy and sell lots, consistent with standard accounting practice widely accepted for VDA reporting in India. Under FIFO, the oldest available buy lot is matched first against each sell transaction. Partial lot allocations are supported. The Income Tax Department has not prescribed a mandatory cost-allocation method for VDAs; users should confirm the appropriate method with their tax adviser. For staked portions of VDA, symbols are matched once the VDAs are being unstaked by the users and used in FIFO logic from the unstaking date.

This sheet maps directly to Schedule VDA in your ITR-2 / ITR-3. Income from Transfer = Consideration Received minus Cost of Acquisition (per FIFO). If the result is negative, it is shown as zero (see General Note above). TDS already deducted is credited against this liability when you file.

Gross Profit = Sell Consideration - Acquisition Cost (fees excluded from both sides). Net Profit = Gross Profit - Buy Fees - Sell Fees (economic profit after all platform charges).
Kindly note that the VDAs sent for staking are appearing in the statement, the values will appear as "0" for values except quantities and Nature of Transaction will be shown as "Staking" under column 17. These are not actual sale but transfer of quantities from SPOT for Staking.

For assets received via staking, rewards, or airdrop, where no cash was paid, the acquisition cost shown here is the Fair Market Value (FMV) of the asset on the date it was credited to your account. This FMV becomes your cost base for future sale. The logic: when you received the reward, that FMV was already treated as income (taxed at slab rates in the Staking sheet). To avoid double taxation, the same FMV is your cost when you eventually sell.

Kindly note, the staked balances of VDA shall not appear here. Only free holdings of the user shall reflect in this statement.

Each row is an individual transaction leg (Buy, Sell, or Funding). Buy/Sell entry → Open Position will be shown as zero and settled during close of the position. Buy/Sell position close → Positive/Negative Realized PNL (proceeds received/ cost of trade in case of loss). Funding Fee paid → Negative PNL. Funding Fee received → Positive PNL. Net PNL = Realized PNL - Fees. For USDT Futures, multiply Net PNL (USDT) by the Reference USDT/INR SPOT Rate to get the INR Fair Market Value for tax reporting. The INR Fair Market Value (FMV) shown may be used for ITR reporting purposes after consultation with a tax adviser. The PLATFORM is not liable for any error reported.

BUY side: Premium paid = Negative Realized PNL (your cost to acquire the option). SELL side: Premium received = Positive Realized PNL (proceeds on closing/writing). DELIVERY (expiry/exercise): If the option expires worthless, Realized PNL = 0 and the full premium paid is a loss. If exercised, the settlement proceeds appear as positive PNL. Net PNL = Realized PNL - Fees.

Boost is a leveraged product. Realized PNL is the gross gain/loss on your position before fees. Net PNL = Realized PNL - Fees (INR). Both are shown in INR directly. The leverage multiplier is shown for context; it does not affect the tax computation directly; only the actual PNL is taxable.

Stage 1 - At Receipt: The Net Value in INR (Gross FMV - Platform Fees) shown here is income in your hands in the year of receipt. Taxable as Income from Other Sources at your individual slab rate - NOT at 30%. Stage 2 - When You Eventually Sell: The same FMV at receipt becomes your cost of acquisition. Profit on sale = Sale Price - FMV at Receipt, taxable at 30% under Section 115BBH.

INR Deposit / Withdrawal: NOT a taxable event. Crypto deposit from your own external wallet: NOT a taxable event (no change of ownership). Crypto withdrawal to your own wallet: NOT a taxable event. Crypto received from a third party (gift / transfer from non-relative): Potentially taxable as Income from Other Sources if aggregate value > Rs.50,000 in the year. Crypto sent to a third party: Treated as a VDA transfer; Section 115BBH and Section 194S may apply.

The USDT Usage sheet reflects all internal movements and consumption of your USDT balance when trading USDT-denominated products (such as USDT Futures, USDT Options, or Boost USDT). All USDT balances are adjusted based on the FIFO (First-In, First-Out) method.

Transaction Types and Treatment

1. USDT Additions (Inflows)

- Positive Realized P&L: Gains generated from USDT derivative positions or products.
- Refunds: Reversals, cashbacks, or promotional refunds credited in USDT.
- Other Positive Entries: Any automated or manual positive balance adjustments.

2. USDT Deductions (Outflows)

- Negative Realized P&L: Losses incurred from USDT derivative positions or products (Sell reference rate capped as Cost of Acquisition date spot reference rate).
- Commissions: Trading fees and transaction commissions deducted directly in USDT.
- Funding Fees: Periodic funding fees paid or exchanged for holding perpetual positions in USDT.
- Other Internal Transfers: Any other internal asset movements, balance deletions, or operational adjustments.

Note: Normal spot purchases and sales are strictly excluded from this sheet and will continue to

Your USDT balance is maintained as a live ledger across all USDT-denominated transactions, Futures P&L, Options P&L, fees paid in USDT, deposits, and withdrawals. Since USDT is a Virtual Digital Asset under Section 2(47A), it is tracked and consumed under the same FIFO methodology as all other crypto assets. Each USDT credit is recorded as a buy lot at the prevailing USDT/INR SPOT rate; each debit consumes the oldest available lot first.
